Finance Function Resourcing and Outsourcing

We offer a full range of accounting services that cut across your day-to-day operations and ensuring regulatory requirements at all stages in your business life cycle. These functions could be wholly outsourced to us or you could require us to second human resources to meet your needs. We offer both full finance outsourcing and secondment services. Whichever works for your business model.

Audit and Assurance Service

Our independent audit service is carried out without compromising the principle of independence and is done in compliance with the International Financial Reporting Standards. With our risk-oriented approach, we offer you more than merely auditing the correctness of your accounts, we offer a comprehensive review of your systems and controls as part of the Audit engagement.

Accounting Process Review and Transformation

Our Accounting Process review and transformation is a very detailed approach involving the following procedures:

- Review of existing Accounting and Financial system
- Assess internal controls and key performance measures
- Assess key accounting processes and alignment with industry best practices
- Develop processes and procedures of key accounting functions
- Design/Review Chart of Accounts
- Identify potential technology-related solutions
- Data migration (Where necessary)

AideOne School of Finance and Tax

- Payroll management
- Payroll system support
- Benefits administration
- Labor regulatory compliance
- Project backend filling
- Staff Training support

Forensic and Investigation Services

AideOne offers a comprehensive suite of services designed to identify and address financial wrongdoings and fraud. Our dedicated team of experts, comprising accountants, analysts, technology experts, and fraud examiners, has the required skill sets to address the ever-changing fraud and forensic landscape.

We help organizations manage the risk and exposures arising from corruption, high-profile & complex financial matters, accounting irregularities, and a wide variety of compliance issues, employee, cash, and procurement fraud. Our services are designed to undertake complex investigations, providing research-based business intelligence and appropriate strategies to solve the situation at hand.

The Output of our forensic work can be used as a Finance Transformation tool to improve the finance department from being a service center to a strategic partner to the shareholders of the business.
